

TTC Technology Standards Hybrid Workshop Event

Launched at the U.S.-EU Summit in Brussels in June 2021, the U.S.-EU Trade & Technology Council (TTC) is a forum for the United States and European Union to coordinate approaches to key global trade, economic, and technologies issues while also deepening transatlantic and economic relations with policies based on shared democratic values. For more information on the TTC, please visit www.trade.gov/useuttc or the EU [Futurium platform](#).

The TTC Technology Standards Working Group (WG1) will hold a hybrid workshop event with options to participate virtually *via* WebEx or in person at the Albert Borschette Congress Centre in Brussels, Belgium, on May 6, 2022. The U.S. Department of Commerce and the European Commission cordially invite interested stakeholders to listen and participate in the following three panels:

1. **Best practices for stakeholders' engagement, in particular involvement of SMEs, startups, academics, and civil society in standards development.**
2. **How to work together in the development of standards for emerging technologies?**
3. **How can standards help support trade in goods with recycled content?**

Date and Time: **FRIDAY, MAY 6, 2022, 12:30 – 17:30 GMT**

*In-person registration and networking will start at 11:30AM

Please use this link to register your interest on or by [April 28, 2022](#), to participate in the workshop. If interested in speaking, please indicate on which panel and provide a brief description of your talk. To register please click [here](#).

(In person participation is limited and registration acceptance is not guaranteed. Additional information, including final agenda and WebEx link, to follow upon registration confirmation.)
