- 5.6 Brownfield area with situations of marginality and private governance

### 6. CONCLUSION

### BIBLIOGRAPHY

## HANDBOOK

HOW TO IMPLEMENT AN URBAN  
STRATEGY FOR THE CIRCULAR REUSE  
OF SPACES AND BUILDINGS

## Next steps

- Integration of feedbacks
- Language check: document easy to read by city officials
- Graphics layout

## Potential collaboration with Sustainable Land Use Partnership

Action no. 3 in the Sustainable Land Use Partnership is very similar and relevant for the work on our Action.

- Ivan Tosics is the lead expert on the field of re-use of underused buildings and spaces is also representing URBACT in the Land Use-Partnership.
- Antwerp is leading the sub-urban network and is also a partner of the Sustainable Land-use and Nature based Solutions (SUL\_NBS) Partnership. Should be a key actor in the further work of the Action.

- Use of URBACT Networks expertise and knowledge?

- Postpone the deadline for the final version of the handbook at the end of October?

- What is the Urban Reuse Agency?
